TJCAA Celebrates 25 Years!

TJCAA Celebrates 25 Years!

TJC and Associates, Inc. is more than 25 years old! We recently celebrated our 25th anniversary with several events. Born in 1998 as the brainchild of Terry Cavanagh, Gianna Zappettini, and Rick Cavanagh, TJCAA has grown from a very small structural engineering services provider to a full-service engineering firm providing structural, electrical, instrumentation, and controls engineering and control systems programming.

Along the way, we have assembled a talented staff! To mark our anniversary, we wanted most of all to celebrate what

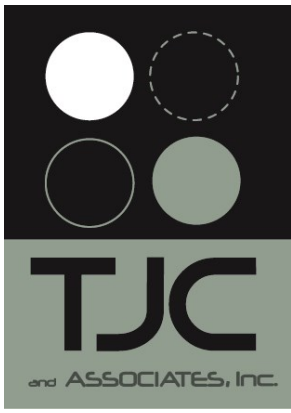

we have built together, including not only the projects we have completed, but also the friendships formed among our staff and with our clients.

Our celebration began with a virtual gathering, so that we could include our TJCAA team members in Florida and Tennessee with our California staff. We laughed together over a slide show of "TJCAA through the Years," watching the staff grow and reliving the many adventurous company events we have enjoyed together all over Northern California. We then completed the next round of our highly competitive online trivia series (see photo), with Terry taking top honors this time.

TJCAA Celebrates
25 Years!

We also got together in person, for a delicious and educational event. We gathered at Kitchen on Fire in Berkeley for a half-day culinary experience. Kitchen on Fire's chefs introduced us to the menu we would be cooking and gave demonstrations of various techniques. We then divided into groups and under the chefs' supervision, we prepared our assigned recipes in the well-appointed, professional kitchen.

After a few minor failures and many major successes, we sat down to enjoy the meal we had prepared: Roasted Fennel and Orange Salad, Seared Steak and Chimichurri, Potatoes Dauphinoise, and White Chocolate Raspberry Cake.

With so many good people, good memories, and good results through the years, there were also many toasts to be made!

Employment Opportunities

TJCAA is looking for qualified engineers to work on great projects with great people. To view and apply for open career positions, visit our website at www.tjcaa.com.
