### TJCAA Green Certification

#### TJCAA Green Certification

TJCAA has reaffirmed its commitment to sustainability and environmental responsibility by achieving Green Certification through the California Green Business Network (CGBN) ([www.greensbusinessca.org](http://www.greensbusinessca.org)). The CGBN works with small to medium-sized businesses to help them exceed environmental regulations in their work and office environments, conserve energy, minimize waste, prevent pollution, and shrink their overall carbon footprint.

electronics, follows water conservation methods, and has EV charging stations and bicycle storage facilities available for employees and visitors.

*TJCAA is Officially Green Certified.*

The certification process begins with a comprehensive checklist that includes 53 different criteria covering every aspect of the business and the work it performs. From there, the CGBN arranges a site visit to verify the information on the checklist and confirm the business is using sustainable and eco-friendly products, has composting and recycling containers in work and break areas, uses energy efficient

TJCAA's hope is that Green Certification will demonstrate to our clients that environmental stewardship can begin small and grow—just as TJCAA has done—and that clients who learn about our eco-friendly values will understand that TJCAA shares their environmental priorities and dedication to our communities and the precious resources we need to grow, develop, and thrive.
